ACX™

Few jobs match the demands placed on refuse and recycling trucks - frequent starts and stops, short runs, big loads, rough terrain, tight areas, heavy power demands, heavy traffic and weather, not to mention meeting the demand for operator comfort and productivity.

With the strongest frame and cab in the industry, more powertrain options - both diesel and natural gas - and the best overall strength-to-weight ratio, the Autocar® Xpeditor® ACX is your complete refuse truck solution.
